EDUCATION

Major: Bachelor of Science in Computer Science

Dec 2023

Minor: Japanese Language (Honors Society JNHS-CC)

University of Vermont, *Burlington, VT*

LANGUAGES & SKILLS

Languages

- JavaScript | TypeScript | JSON | Python | C | C++ | Swift | HTML | CSS | SQL |

Skills

- Full-Stack Dev | E-commerce | ROS Robotics | Linux CLI | Git | IOS Dev | ShopifyCLI |

WORK EXPERIENCE

Freelance Web Developer, [Blue Sky Roofing](#) | Richmond, VT

3/26 - Present

- Refurbishing clunky website components with custom-coded solutions
- Educating management to independently manage marketing, campaigns, etc. to save resources

Freelance Web Developer, [Jake's Property Management](#) | Eden Mills, VT

1/26 - 6/26

- Overhauled company's online presence w/ creation of custom-built Wordpress site
- Built up the SEO framework and google profile for this new website
- Simplified business management by integrating owner's email with the hosting platform

Contract Web Developer, [Johnson Woolen Mills](#) | Johnson, VT

3/25 – 4-26

- Implemented UX/UI redesign of an E-commerce website using ShopifyCLI code editor
- Collaborated with brand ambassadors to plan the web and IT aspects of their rebrand, along with backend QOL improvements
- Delivered 31% total sales growth YTD and a 16% conversion rate increase through design, workflow, and accessibility improvements.

Web & Digital Strategy Lead, New York Pizza Oven | Colchester, VT

2/25 – Present

- Enhancing the website's design and optimizing the integration of its Point of Sale (POS) API
- Managing the pizza shop's online marketing campaigns

Tech Consultant, Donahue & Associates | Burlington, VT

5/23 – 8/23

- Taught realtors how to get aerial shots of properties with a drone

Construction, Bordeaux Construction | Burlington, VT

6/20 – 12/24

- Built planning and communication skills working in potentially dangerous environments

PROJECTS

Personal Portfolio & Fullstack Web App

7/24 – 1/25

- Built my personal web portfolio, containing my first full-stack app
- Acquired fullstack development techniques, crucial for a modern web developer
- Website contains additional information about my coding journey

Autonomous Drone Navigation–github.com/McGovern7/ardupilot-nav-scripts

1/24 – 4/24

- Programmed autonomous navigation software for a drone in a virtual environment
- The drone analyzes its sensor data, and maneuvers through a 3D maze

- Established keen understanding of robotics system & software design

RELEVANT COMPUTER COURSES

Web App Development

Developed an IOS app which streamlines flight scheduling between pilots. Uses Apple's AirTag feature. 3 member semester long project.

Software Engineering

Using Agile Development in a group of 4, coded a simulated monopoly game using PyGame. Sharing code through GitLab for this semester-long project.

Data privacy

Solo Project-based Learning: Added privacy mechanisms to create secure and accurate coordinate data. Plotted data on a world map with GeoPandas.

Cybersecurity Principles

Infiltrated my professor's (fake) online bank. Applied cryptographic hashing on data to secure computer networks. Newfound understanding of network threat vectors allows me to build more secure software.
